

Component	Practical performance proposal
Level	SL
Candidate	B
Mark	25
Stimulus	Vitruvian Man

The proposal offers an original, imaginative, practical and illuminating (casting light on the process) interpretation of the stimulus with clear descriptions of onstage action and how this action will be staged. The concept of 'traditional Bunraku' guides all artistic choices in a highly coherent manner. There has been a practical, inventive and in-depth exploration of the stimulus with brainstorming, research and clear signs of personal engagement. A comprehensive understanding of appropriate production elements is evidenced with detailed sketches and diagrams properly annotated and explained. These elements are used with one another to produce desired effects.
